

Izak 9

Izak9 is an exciting new radical and immersive 3D maths based active learning concept - comprising of one big cube 40cm high made up of 27 smaller ones.

The cube comes with a range of e-learning materials presented by two animated robot characters Abacus and Helix, who provide teachers with stimuli to guide children through their active shared learning experience.

Izak9 enables children to learn and enjoy maths – builds self-esteem and self-confidence – making maths fun!

A growing number of Donegal schools have been using the Izak 9 resource

(free from the Centre to teachers who have attended training)

This course is being delivered by two IZAK 9 locally trained Facilitators and is an opportunity for teachers to learn how to access the associated online resources and use the Izak 9 cube in their classroom.

Tutor: Mary Durning

Date: 22nd November 2018

Time: 7pm – 9pm

Venue: Inishowen Gateway Hotel, Inishowen
